

Prof. Todd Wehner, WNR Distinguished Professor at the Department of Horticultural Science in North Carolina State University, USA, will be present at the 10th World Convention on Stevia 2022. Prof. Wehner will be giving a talk about "**Optimum Experiment Size for Stevia Trials**".

Optimum trials for stevia will give us the most data for the least input of resources. The question can be answered by determining the optimum number of years, locations and replications to use in a yield trial. The combination that provides the most information will be the one with the smallest error variance. Data for the analysis is obtained from previous trials.

Among the speakers in this session:

Dr. Mahendra Dia, from the Department of Horticultural Science in North Carolina State University, USA, will join Prof. Wehner in this session to further talk about the Optimum Experiment Size for Stevia Trials.

Stevia Tasteful 2022
